

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A pre-paid airline ticket comprising:
a record of an advance-purchase of an airline ticket for a fixed price to be utilized by a customer to book a flight on one of a plurality of predetermined flights available for the pre-paid airline ticket to be used; ~~the pre-paid airline ticket including~~
an identifier, ~~the identifier~~ associated with said record, uniquely identifying the pre-paid airline ticket; ~~and and operable to be utilized by the customer to book a flight, and, associated with the identifier,~~
a plurality of geographic flight parameters and a plurality of non-geographic flight parameters associated with said record, at least one of the plurality of geographic flight parameters being unspecified;
wherein a customer uses said identifier to book one of the predetermined flights via a communications network.
2. (Original) The pre-paid airline ticket of claim 1 wherein the identifier comprises an alpha-numeric sequence.
3. (Original) The pre-paid airline ticket of claim 1 wherein the plurality of non-geographic flight parameters comprise a date, a time, a flight number, and a seat.
4. (Original) The pre-paid airline ticket of claim 1 wherein the plurality of non-geographic flight parameters further comprise one or more unspecified non-geographic flight parameters.

5. (Original) The pre-paid airline ticket of claim 4 wherein the one or more unspecified non-geographic flight parameters comprise a range of possible values from which the one or more unspecified non-geographic flight parameters may be selected.

6. (Original) The pre-paid airline ticket of claim 1 wherein the plurality of geographic flight parameters comprise a departure location and a destination.

7. (Original) The pre-paid airline ticket of claim 1 further comprising a dependence between two or more of the plurality of geographic flight parameters.

8. (Original) The pre-paid airline ticket of claim 7 wherein the dependence comprises a maximum distance between the destination and the departure location.

9. (Original) The pre-paid airline ticket of claim 7 wherein the dependence comprises a geographical region from which the departure location and the destination must be selected.

10. (Original) The pre-paid airline ticket of claim 7 wherein the dependence comprises a geographical region from which the departure location must be selected for a specified destination.

11. (Original) The pre-paid airline ticket of claim 7 wherein the dependence comprises a geographical region from which the destination must be selected for a specified departure location.

12. (Original) The pre-paid airline ticket of claim 1 further comprising a wallet-sized card, the wallet sized card including a magnetic strip, the magnetic strip comprising an encoded representation of the unique identifier.

13. (Original) The pre-paid airline ticket of claim 1 further comprising a wallet-sized card, the wallet-sized card including a bar code, the bar code comprising an encoded representation of the unique identifier.

14. (Original) The pre-paid airline ticket of claim 1 further comprising a printed receipt, the printed receipt including a first part for presentation to an airline and a second part for a customer's records, the printed receipt including, in printed form, the unique identifier, the plurality of non-geographic flight parameters, and the plurality of geographic flight parameters.

15. (Original) The pre-paid airline ticket of claim 1 further comprising an electronic receipt, the electronic receipt including, in electronic form, the unique identifier.

16. (Original) The pre-paid airline ticket of claim 1 further comprising an email receipt, the email receipt including, in electronic form, the unique identifier.

17-33. (Withdrawn)

34. (Currently Amended) A method for providing pre-paid airline tickets comprising:
storing a plurality of ticket options in a ticket option database, each ticket option comprising a ticket price and a plurality of flight parameters, at least one of the plurality of flight parameters being a geographic flight parameter;
presenting the ticket options to a customer;
receiving a ticket selection from the customer;
receiving a payment from the customer, the payment being equal to the ticket price;
associating a unique identifier with the selected ticket option;
storing the unique identifier and the associated ticket option; and

providing a pre-paid airline ticket to the customer, the pre-paid airline ticket comprising a record of the unique identifier ~~operable to be utilized~~ used by the customer to book a flight via a communications network on one of a plurality of predetermined flights available for the pre-paid airline ticket to be used and a record of one or more of the plurality of flight parameters, at least one of the at least one geographic flight parameter being unspecified.

35. (Original) The method of claim 34 further comprising booking a flight using the pre-paid airline ticket.

36. (Original) The method of claim 35 wherein booking a flight is performed interactively using the World Wide Web.

37. (Original) The method of claim 34 further comprising periodically updating the ticket option database from a remote airline server.

38. (Original) The method of claim 34 wherein receiving a payment from the customer further comprises transferring funds for the customer using a remote financial transaction server.

39. (Original) The method of claim 34 wherein providing a pre-paid airline ticket further comprises generating a wallet-sized card with the unique identifier encoded in a magnetic strip.

40. (Original) The method of claim 34 wherein providing a pre-paid airline ticket further comprises generating a wallet-sized card with the unique identifier encoded in a bar code.

41. (Original) The method of claim 34 wherein providing a pre-paid airline ticket further comprises generating a printed receipt, the printed receipt including a first part for presentation to an airline and a second part for the customer's records, the printed receipt including, in printed form, the unique identifier and the plurality of flight parameters.

42 (Original) The method of claim 1 wherein a plurality of pre-paid airline tickets are provided to a wholesale customer, the wholesale customer further reselling one or more of the pre-paid airline tickets to a retail customer.

43. (Original) The method of claim 1 further comprising providing an electronic bulleting board where a plurality of customers resell pre-paid airline tickets.

44. (Currently Amended) A computer program embodied on a computer-readable medium for providing pre-paid airline tickets using a pre-paid ticket identifier database, the database comprising a plurality of records, each record including a plurality of fields, the plurality of fields comprising:

an identifier field, ~~the identifier field including an identifier~~ that uniquely identifies a pre-paid airline ticket and ~~operable to be utilized~~ used by a customer to book a flight on one of a plurality of predetermined flights available for the pre-paid airline ticket to be used; and

a plurality of geographic flight parameter fields and a plurality of non-geographic flight parameter fields, at least one of the plurality of geographic flight parameter fields including a geographic flight parameter being unspecified.

45. (Original) The computer program of claim 44 wherein the identifier included in the identifier field comprises an alpha-numeric sequence.

46. (Original) The computer program of claim 44 wherein the plurality of non-geographic flight parameter fields include a restrictions field, the restrictions field including any restrictions on use of an associated pre-paid airline ticket.

47. (Original) The computer program of claim 44 wherein the unspecified geographic flight parameter comprises a plurality of choices from which the unspecified geographic flight parameter may be specified.

48. (Original) The computer program of claim 44 wherein the plurality of geographic flight parameter fields include an allowed destinations field and an allowed departures field.

49. (Original) The computer program of claim 44 wherein the plurality of geographic flight parameter fields includes a region field, the region field providing information which establishes a dependence between an allowed destinations field and an allowed departures field.

50. (Previously Presented) The pre-paid airline ticket of claim 1, further comprising an expiration date for the pre-paid airline ticket to expire.

51. (Previously Presented) The pre-paid airline ticket of claim 50, wherein the expiration date specifies the date by which the customer is to utilize the identifier in booking a flight.

52. (Previously Presented) The method of claim 34, further comprising applying an expiration date to each ticket option.

53. (Previously Presented) The method of claim 52, further comprising receiving the identifier in conjunction with a process of booking a flight.

54. (Previously Presented) The method of claim 53, further comprising, in response to receiving the identifier, determining that the expiration date associated with the pre-paid airline ticket being utilized to book the flight is on or before a current date.

55. (Previously Presented) The computer program of claim 44, wherein the records of the records of the database further include an expiration date for an associated pre-paid airline ticket to expire.

56. (Previously Presented) The computer program of claim 44, further operable to receive the identifier being uniquely associated with a pre-paid airline ticket and to determine whether the pre-paid airline ticket has expired based on the associated expiration date.

57. (Previously Presented) The pre-paid airline ticket of claim 1, wherein the identifier is operable to book a seat on a flight from one of multiple air travel carriers.

58. (Previously Presented) The pre-paid airline ticket of claim 57, wherein booking the seat costs at most the fixed price.

59. (Previously Presented) The pre-paid airline ticket of claim 1, wherein the fixed price is below market price.

60. (Previously Presented) The method of claim 34, wherein the identifier is operable to book a seat on a flight from one of multiple air travel carriers.

61. (Previously Presented) The method of claim 60, wherein booking the seat costs at most pre-paid payment.

62. (Previously Presented) The method of claim 34, wherein the pre-paid payment is below market price.

63. (Previously Presented) The computer program of claim 44, wherein the identifier is operable to book a seat on a flight from one of multiple air travel carriers.

64. (Previously Presented) The computer program of claim 63, wherein booking the seat costs at most a pre-paid price.

65. (Previously Presented) The computer program of claim 64, wherein the fixed price is below market price.

65 ~~66~~. (Currently Amended) A pre-paid airline ticket comprising:
a record of an advance-purchase of an airline ticket for a fixed price including an identifier to be utilized ~~used~~ by a customer to book a flight via a communications network from one of multiple air travel carriers offering flights including seating available to be booked with the pre-paid airline ticket ~~purchased at the fixed price; and~~
~~an identifier to be utilized by the customer to book the flight from one of the multiple air travel carriers offering flights including seating available to be purchased using the pre-paid airline ticket.~~

66 ~~67~~. (Currently Amended) The pre-paid airline ticket of claim ~~65~~ ~~66~~, further comprising a plurality of geographic flight parameters.

67 ~~68~~. (Currently Amended) The pre-paid airline ticket of claim ~~66~~ ~~67~~, wherein at least one of the geographic flight parameters is unspecified.

68 ~~69~~. (Currently Amended) The pre-paid airline ticket of claim ~~66~~ ~~67~~, wherein the geographic flight parameters includes regions.

69 ~~70~~. (Currently Amended) The pre-paid airline ticket of claim ~~66~~ ~~67~~, wherein the geographic flight parameters includes airports.

~~70~~ 71. (Currently Amended) The pre-paid airline ticket of claim ~~65~~ 66, further comprising a plurality of non-geographic flight parameters.

~~71~~ 72. (Currently Amended) The pre-paid airline ticket of claim ~~70~~ 71, wherein the non-geographic flight parameters are unspecified.

~~72~~ 73. (Currently Amended) The pre-paid airline ticket of claim ~~65~~ 66, further comprising information identifying the customer.

~~73~~ 74. (Currently Amended) The pre-paid airline ticket of claim ~~65~~ 66, wherein the fixed price is below market price.

~~74~~ 75. (Currently Amended) The pre-paid airline ticket of claim ~~65~~ 66, wherein the seating is available to be purchased costing at most the fixed price.
